

# PT. SHINWA NONWOVENS INDONESIA

With 10 years of experience in manufacturing SPUNLACE NONWOVEN, we have earnestly improved the technology of nonwoven fabric, achieving growth as one of the leading nonwoven fabric manufacturers through the integration of planning to manufacturing, processing and sales.

Located in Pasuruan city, East Java province, Indonesia. Our factory is located in the PIER Industrial Park, about 50 km southeast of central Surabaya, where many Japanese companies are based. In recent years, an expressway exit has been completed and logistics have been improved.

Surabaya is the capital of East Java and the second largest city in Indonesia with a population of about 3 million. Historically, the city has prospered as a trading centre since Dutch colonial period, and Tanjung Perak Port in Surabaya City remains one of the largest ports in Indonesia. Our factory covers about 80,000m<sup>2</sup> land area and has more than 250 qualified workers with a production capacity of 24,000 tons/year.

Focusing on a high level non-woven fabric manufacturing know-how, we manufacture the highest quality nonwoven fabric to supply both Indonesian and international market. Our commitment is to give our effort in order to meet the needs of the global market and guarantee a high-quality product.

We have excellent human resources on hand to make sure that every process is smooth and precise.

# PT. SHINWA NONWOVENS INDONESIA SPUNLACE NONWOVEN PRODUCT

We manufacture SPUNLACE NONWOVEN product that entangles fibres with high pressure water jet. The characteristic of this nonwoven is that it does not use any binders (adhesive), hence it is suitable for wet tissue, medical gauze, cosmetics etc., where hygiene is important.

Our nonwoven ranges from low gsm up to 100 gsm, made of mainly Rayon/Viscose and Polyester fibres, with various composition design and blends. We also use some specialty fibres, ensuring our nonwoven fabric can meet the international quality standard.

By having various type of nonwoven, we are confident to support vast usage in our customer.

Our high-quality SPUNLACE NONWOVEN is mainly used for wet wipes for all purposes ranging from baby wipes to surface wipes, cosmetics such as make-up remover wipes and face mask, as well as medical products such as gauze.

Besides, our customers also use our nonwoven fabric for automotive interior use.

**By combining various materials, patterns, thickness, and textures, we proudly support every customer' s needs.**

# PT. SHINWA NONWOVENS INDONESIA PRODUCT QUALITY MANAGEMENT

With strict international quality standards and adopted Japanese quality control, we manage every aspect related to our production process. In addition to maintenance of each machine, management of temperature and humidity in the factory, positive pressure management, management of workers' clothing and entrance restrictions, and insect control measures are implemented from the viewpoint of management of the entire production line and further maintenance of the factory environment. We also carry out quality control system standards and 5S initiatives.

We're proud to be a holder of ISO 9001:2015 certificate in quality management system, ISO 14001:2015 certificate in environmental management system, and ISO 13485:2016 certificate in medical devices quality management system. Also, we are a part of certified FSC CoC and Halal assurance company

We are FSC® certified
